## Allergen Control Materials

Ensure the integrity of your allergen testing with the AgraStrip® Pro Allergen Control Material – your solution for dependable allergen management.

AgraStrip® Pro Allergen Control Materials, are an essential companion for your AgraStrip® Pro allergen test kits. Designed to verify the accuracy and reliability of your allergen testing procedures, this product is a must-have for maintaining the highest standards of allergen management.

### Product Overview

The AgraStrip® Pro Allergen Control Material set includes both positive and negative control materials, formulated to validate the performance of your AgraStrip® Pro allergen test kits. The positive control is a spiked rice flour matrix, incorporating traces of almond, beta-lactoglobulin, brazil nut, casein, cashew, coconut, crustacea, gluten, hazelnut, lupin, macadamia, milk, mustard, peanut, sesame, soy, walnut, and whole egg allergens. The negative control, a feed lime matrix, ensures your tests can accurately identify the absence of these allergens.

### Key Features

**Compatibility:** Specifically designed for use with AgraStrip® Pro Allergen test kits.

**Allergens covered:** Comprehensive coverage includes 19 common allergens, from nuts to gluten, ensuring a broad range of tests can be validated.

**Package contents:** Each package contains two plastic containers, holding 5g each of the positive and negative control materials, providing ample quantity for multiple verifications.

**Accuracy and sensitivity:** Tailored for qualitative lateral flow devices (LFDs), these controls demonstrate clear positive or negative results, aligning with the specific allergens tested.

**Shelf life and storage:** These control materials have a shelf life of 12 months when stored at room temperature, simplifying inventory management.

## Features and Benefits

### Quality Assurance

Regular use of these control materials as part of your allergen testing protocol enables you to verify the accuracy and consistency of your test results.

### Reliability

By providing a means to conduct in-house verification, you reduce the risk of false negatives or positives, enhancing the trust in your allergen management processes.

### Support and Service

Benefit from the exceptional technical support provided by Romer Labs, ensuring that any questions or concerns about the use of the AgraStrip® Pro Allergen Control Material are promptly addressed.
